

**HAVE A SHARK DAY**  
WHAT IS SHARK?

BY PEPPERMINT SHARK

WE'RE A COOL MARINE PREDATOR THAT HAVE BEEN SINCE ...

450 MILLION YEARS AGO

WE HAVE MANY SPECIES FROM

THE **BIGGEST** ONES ... TO THOSE TINY ONES

WE ARE CLOSELY RELATED TO

**RAY**

OUR SKELETON ARE MADE OF "CARTILAGE"

IT'S LIGHTER AND MORE FLEXIBLE THAN BONE

AS SAME AS HUMAN'S

EARS & NOSE

SO SOFT!

STOP IT!

GENERALLY, FOSSIL IS FORMED BY BONES, SHELLS OR HORNS. BUT SHARK'S CARTILAGE IS SOFT TISSUE WHICH HAVE BEEN DECOMPOSING FROM TIME TO TIME, WE LATER FOUND ONLY IT'S TEETH.

LET'S SHARE YOUR IDEAS ABOUT
